CORRECT  
PRINT

**If you can see the dashed line once the coin has been positioned, it means your print size is correct and you can proceed with the following step (2).**

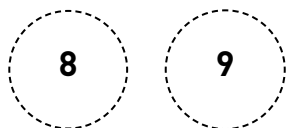

**2. Position your ring on the following circles and choose the one that best fits your ring. Make sure that the ring perfectly matches with the circle (the circle needs to be slightly visible, but there shouldn't be a margin between it and the ring). We suggest you to use a classic ring during this process (a fine ring, for example). The simpler the better.**

N.B. : THE WHOLE PROCEDURE NEEDS TO BE DONE ON THE PRINTED PAGE AND  
**NOT ON A COMPUTER / MOBILE SCREEN.**
